

FIG. 1 is a block diagram of a system architecture. The system includes a central cloud labeled "INTERNET 110". Three "CASH ACCEPTING CLIENT 120" devices are connected to the Internet 110. The Internet 110 is connected to a "SERVER POOL 180". The server pool 180 contains four "APPLICATION SERVER 130" and two "DATABASE SERVER 140". Each application server 130 is connected to the Internet 110. Each database server 140 is connected to two "DATABASE 150" units. The database servers 140 are also connected to the application servers 130.
